Summary

B.Tech Information Technology student with strong foundations in Python, Machine Learning, Artificial Intelligence, Data Structures and Algorithms, and Full Stack Development. Skilled in developing web-based applications and machine learning solutions using modern software development practices. Passionate about building intelligent software solutions using Artificial Intelligence and Deep Learning to solve real-world problems. Quick learner with strong analytical, problem-solving, and collaborative skills.

Education

SASTRA Deemed University (2023 – Present)

Bachelor of Technology (B.Tech) in Information Technology

CGPA: 8.4526/10

Velammal Matriculation Higher Secondary School (2023)

Higher Secondary Certificate (PCM)

Percentage: 95%

Technical Skills

Programming Languages: Python, C++, Java (Basic)

Artificial Intelligence and Machine Learning: Machine Learning, Deep Learning, Scikit-learn, PyTorch, Generative AI, Retrieval-Augmented Generation (RAG)

Data Analysis and Visualization: Pandas, NumPy, Matplotlib, Seaborn

Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js, Bootstrap, REST APIs

Databases: SQL, MongoDB, PostgreSQL (Supabase)

Developer Tools: VS Code, Ubuntu, Git, GitHub, Jupyter Notebook

Core Concepts: Data Structures and Algorithms (DSA) and Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems

Projects

Workspace AI – AI-Powered Workspace Assistant

Tech Stack: React.js, Node.js, Express.js, PostgreSQL (Supabase), Google Gemini API, Retrieval-Augmented Generation (RAG), Gmail API, Google Calendar API, Google OAuth, REST APIs

- Developed an AI-powered productivity assistant that streamlines email, calendar, and task management through a unified conversational interface.
- Engineered a full-stack application using React.js, Node.js, Express.js, PostgreSQL (Supabase), and Google Gemini API with secure Google OAuth authentication.
- Designed an AI agent workflow consisting of a Planner and Tool Router to interpret natural language queries, invoke appropriate backend services, and automate workspace operations.
- Integrated Gmail and Google Calendar APIs to summarize emails, retrieve schedules, manage events, and organize tasks through intelligent AI-driven workflows.
- Implemented Retrieval-Augmented Generation (RAG) to retrieve relevant contextual information and improve the accuracy and reliability of AI-generated responses.

Diabetic Retinopathy Classification using Deep Learning

Tech Stack: Python, PyTorch, GoogLeNet, ResNet18, Transfer Learning, APSO, RSVM, OpenCV, EyePACS Dataset

- Developed a deep learning-based diabetic retinopathy classification system using GoogLeNet and ResNet18 with transfer learning.
- Applied Adaptive Particle Swarm Optimization (APSO) for feature selection to improve classification performance.
- Implemented a Radial Support Vector Machine (RSVM) for multi-class disease severity prediction using the EyePACS retinal image dataset.

Experience

Virtual Internship 6.0 – Infosys SpringBoard (Oct 2025 – Dec 2025)

- Contributed to the development of the Parallel Text Handling Processor project, applying text-processing techniques to solve real-world problems.
- Collaborated in implementing software solutions while gaining practical experience in software development and problem-solving.

Full Stack Intern | Tata Communications Limited (Dec 2025 – Jan 2026)

- Completed hands-on training in Full Stack Web Development, gaining practical experience in frontend and backend technologies.
- Developed web application modules and followed industry-standard software development workflows using modern development tools.

Certifications

Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp – Udemy (99 Hours)

Covered Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, and AI model deployment.

Programming Fundamentals using Python – Infosys Springboard

Covered Python programming, object-oriented programming, functions, file handling, and problem-solving.

Database Management System – Infosys Springboard

Covered relational databases, SQL, normalization, transactions, indexing, and database design.

Soft Skills

Problem Solving, Analytical Thinking, Teamwork, Communication, Adaptability, Continuous Learning

Languages

English, Tamil, and Saurashtra
